GENERAL AND REVENUE SECRETARIAT.

Scr Nos

Part B for September 33

SUBJECT

Making deductions on accounts of roads in
connection with the collection of road metal
and gravel in Municipalities and District Boards

2267) The Deputy Commr of Dist
Presidents of District Boards
Comptroller to Govt

By O No 2 2067-84 dated 16-9-33

Directs that the Chief Engineer's Circular in this
matter of making deduction on account of
be made applicable to Municipalities & Dist Boards.
The K & T Sanitary Board

Office of the Deputy Commissioner,

Mysore District

Dated, Mysore, 9th November 1932

From

The Deputy Commissioner,

Mysore District, Mysore

To

The Secretary to the Government of

His Highness the Maharaja of Mysore,

General Department, Bangalore

Sir,

Audit Objection

In forwarding herewith an extract from the objection statement requiring sanction of Government for not having made deduction on account of voids while passing bills for collection of road metal and gravel in the Chamarajaganur Municipality in the year 1930-31, I have the honor to request that sanction of Government may kindly be obtained to waive the objection.

The President's report No 135/32-33 dated 26th October 1932 accompanies

I have the honor to be,

Sir,

Your most obedient servant,

Deputy Commissioner
in charge,
Mysore District

46/50 road to ...
...
1) The auditor says
that deviation from
the existing practice
requires sanction. The
President explains that deductions
are not made for voids the
comptroller may be understood as
whether the explanation may be
... whether the M. A. m

19) If the Chief Engineer's Circular instructions are required to be followed by Local Bodies the Government Order to be issued should be either a general one, laying down that such instructions should be followed by Local Bodies and should be incorporated in the concerned Local or Municipal Fund Codes without a separate order of Government in each case or a special one ^{should be issued} in each case requiring particular instructions being followed. In the former case, the order must be a general one without referring to any particular subject and if the latter ~~xxx~~ be the intention the circular instructions should form an annexure to the order.

OFFICE OF THE COMPTROLLER TO THE GOVERNMENT
OF HIS HIGHNESS THE MAHARAJA OF MYSORE

No LAD 232

Bangalore dated 30th May 1933

From

Me 66-32-236

M VENKATESA HINGAI Esq MA
Comptroller to the Government of
His Highness the Maharaja of Mysore
Bangalore

To

H V, Ramaswamiya Esq, M A, B L,
Secretary to the Government of Mysore,
General Department,
Bangalore

RECEIVED
31 MAY 1933
No. 1007
Sif

With reference to your letter No L 4039/Ml 66-32-93 dated the 9th December 1932 and subsequent reminder thereon dated the 26th April 1933 asking for my opinion in the matter of waiving under the circumstances explained by the Municipal President of the Chamarajanagar Municipality, the audit objection ^{relating} to the accounts of that Municipality for the year 1930-31, that no deductions had been made as in the P W D, on account of "voids" in the metal and gravel heaps collected for road work &c, I have the honour to state that the objection in question (vide para 25 of the Audit Note of the Chamarajanagar Municipality for 1930-31) has been based on the practice obtaining in the Public Works Department from a very long time under the authority of the Chief Engineer's Circulars No 10 dated the 27th May 1913, No 7 dated the 23rd September 1916 and No 11055-7 dated the 2nd May 1933 (Copies of which are herein enclosed for ready reference) though no corresponding rule is found either in the Mysore Public Works Account Code or the Municipal Account Manual, Part II

It is necessary to extend the application of the circulars referred to above to all Local Boards also (i.e., the several Municipalities and the District Boards in the State and the K G F Sanitary Board) where considerable amounts of public money are being spent year after year on the collection of road metal and gravel. I therefore request that necessary sanction of Government to the proposed extension of the system to the Local Bodies may be obtained and communicated at an early date, on receipt of which necessary action will be taken to amend the Municipal Account Manual accordingly.

In the case in point I agree to the explanation offered
by the President of the Chamaravaram Municipality being ac-
cepted and the audit objection being waived

I have the honor to be,
Sir,
Your most obedient servant,

M Venkatasubramanian
Comptroller

Circular No 7 of the 23rd September 1918 from the
Chief Engineer of Mysore to the Superintending Engineers of
Northern and Southern Circles and the Superintending Engineer,
Cauvery Reservoir Works

(mt)† "In para 11 of this ~~of this~~ office circular No 10
dated the 27th May 1913, it is ordered that a certain deduc-
tion should be made in the heights of metal heaps to compensa-
tion for hollows and voids. The figure ought to have been 1' per
foot and (point 1 foot as is entered there by mistake
this may be corrected accordingly "

Letter No 11055-7 dated 2nd May 1933 from the Chief Engineer of Mysore, Bangalore, to the Superintending Engineers of Circles, and the Executive Engineer, Water Supply Division

Subject:- Voids on road metal and gravel

I have the honor to inform you that in this office Circular No 10 dated the 27th May 1913 - as amended in Circular No 7 dated the 23rd September 1916, it was ordered that to compensate for the hollows and voids in the metal heaps, a deduction of 0 1' per feet should be made in the measured height of heap and the practice of allowing the contractors to make up the deficiency should be put a stop to. From the reports received, it is seen that the instructions given above are not followed uniformly

2 The Executive Engineers of Divisions may be informed that in future deductions of 1/10 the height for metal heaps and 1/7th for gravel heaps should be made uniformly in all the Divisions

✓

No 11058/2 Dated Camp, Mysore the 2nd May 1933

Copy of the above (with copies of Circular Nos 10 and 7 referred to above) is forwarded with compliments to the Comptroller of Mysore, for information, with reference to correspondence ending with his letter No 453/LAD dated the 9th April 1933

Circular No 10 dated 27th May 1913 from the Chief Engineer of Mysore, Bangalore to the Superintending Engineers of Northern and Southern Circles, and the Superintending Engineer, Cauvery Reservoir Works

CIRCULAR MEMORANDUM

In accordance with the recommendations of the Special Committee appointed to examine what additions or alterations, if any, are required in the existing specifications for road maintenance and methods of road administration it has been decided to issue the following instructions in the matter:-

A EXECUTION OF WORKS

- (1) For purposes of road maintenance, the year shall be divided into two periods, one from June to December and the other from January to end of May
- (2) During the first period, only spreading of materials and drainage works and petty repairs should go on, and during the second all collections both for special recoats and petty repairs during the succeeding year must be pushed on, so as to have the requisite materials ready at site before the monsoon
- (3) No collection work should be permitted to go on, while consolidation is in progress. The present practice of collection during the season and consolidating the same should be put a stop to as it leads to great abuse
- (4) The sub-head "collection of materials" in the existing printed form of estimate may be omitted under the circumstances
- (5) The item 'collection of materials for the ensuing year' should include both materials for special recoats and also for petty repairs. Whatever materials are collected during the collection season will thus be accounted for under one sub-head only and issued for works during

the

the succeeding year, at so much for special repairs and so much for petty

- (6) The quantity allotted for special recoats should, as a rule, be not less than 80 per cent of the total collection and the cost not less than 40 per cent of the grant for the road
- (7) With a view to secure better consolidation on our roads, the rate for this work may be increased by one anna per cubic yard and in exceptional cases where the rain fail, contractor may be paid extra for carting water with the special permission of Superintending Engineer
- (8) As all collections for petty repairs are not to be transferred to and included under "collection for the ensuing year", the provision under ordinary maintenance sub-head may be reduced to about 20 to 25 per cent of the total grant for the road

The question of the revision of Lead Registers is very important and this work should be taken in hand and completed early. Correct charts showing the position of all quarries, situated along side of road and a statement of actual leads must be prepared without loss of time

- (9) On all but provincial roads it should be made a rule that the best materials available within a radius of 3 miles should be used, instead of carting materials from distant quarries and thus paying heavy lead

B ADMINISTRATION

- (10) Very close supervision and check of the quality and quantity of work done are necessary
- (11) All collections of materials should be checked by the Sub-Division Officers, in the first instance, and by the Executive Engineer latterly, to the extent of at least ten per cent, before any spreading is allowed

As regards the items of work under ordinary maintenance Sub-Division Officers should check not less than 50 per cent of the measurements

In recording the measurements of heap, only the actual dimensions should be recorded in feet and decimals and contents calculated accordingly. Special rods with decim ls marked may be used for measuring heights. To compensate for the hollows and voids, a deduction of 0.1 ft should be made in the measured height of the heap. The present practice of allowing the contractors to make up the deficiency should not be tolerated any longer.

The above instructions shall come into force from 1st July 1913

NO L 2067 84—ML 06 32 267 DATED 16TH SEPTEMBER 1933

Circular No 10 dated the 27th May 1913 from the Chief Engineer of Mysore to the Superintending Engineers of Northern and Southern Circles and the Superintending Engineer Cauveri Reservoir Works

CIRCULAR MEMORANDUM

In accordance with the recommendations of the Special Committee appointed to examine what additions or alterations if any are required in the existing specifications for road maintenance and methods of road administration it has been decided to issue the following instructions in the matter —

*

In recording the measurements of heap only the actual dimensions should be recorded in feet and decimals and contents calculated accordingly. Special rods with decimals marked may be used for measuring heights. To compensate for the hollows and voids a deduction of 0.1 feet should be made in the measured height of the heap. The present practice of allowing the contractors to make up the deficiency should not be tolerated any longer.

Circular No 7 of the 23rd September 1916 from the Chief Engineer of Mysore to the Superintending Engineers of Northern and Southern Circles and the Superintending Engineer Cauveri Reservoir Works

In para 11 of this office Circular No 10 dated the 27th May 1913 it is ordered that a certain deduction should be made in the heights of metal heaps to compensate for hollow and voids. The figure ought to have been 1 per foot and not point 1 foot as is entered there by mistake. This may be corrected accordingly.

Letter No 11055 7 dated the 2nd May 1933 from the Chief Engineer of Mysore Bangalore to the Superintending Engineers of Circles and the Executive Engineers Water Supply Division

SUBJECT VOIDS ON ROAD METAL AND GRAVEL

I have the honor to inform you that in this office Circular No 10 dated the 27th May 1913 as amended in Circular No 7 dated the 23rd September 1916 it was ordered that to compensate for the hollows and voids in the metal heaps a deduction of 0.1 per foot should be made in the measured height of heap and the practice of allowing the contractors to make up the deficiency should be put a stop to. From the reports received it is seen that the instructions given above are not followed uniformly.

2 The Executive Engineers of Divisions may be informed that in future deductions of one tenth the height for metal heaps and one seventh for gravel heaps should be made uniformly in all the Divisions.

No 11058—2 dated Camp Mysore the 2nd May 1933

Copy of the above (with copies of Circular Nos 10 and 7 referred to above) is forwarded with compliments to the Comptroller of Mysore for information with reference to correspondence ending with his letter No 4583—L A D dated the 9th April 1933.
